- **Clutch:** The clutch, as with any manual transmission, will eventually wear out, requiring replacement. This is a more involved repair, but thankfully, parts are relatively available.
- **Suspension Components:** Off-road use can put significant stress on suspension components. Regular inspection and replacement of worn-out parts are essential to maintain safe and comfortable handling.
- **Rust:** Depending on the climate the vehicle was driven in, rust can be a significant concern for older vehicles like the 1993 Hilux Surf. Careful inspection for rust is crucial before purchase.
