Purchases and Ads

- **In-App Purchases (IAP):** Offer premium features, virtual goods, or subscriptions within your app. This is a highly effective monetization method for many app categories. Optimize IAP placement and pricing strategies for maximum conversion.
- **In-App Advertising:** Integrate ads from networks like AdMob or similar. Choose ad formats that align with your app's user experience. Balance monetization with user satisfaction to prevent negative app store reviews.
- **Freemium Model:** Offer a basic version of your app for free, and then provide premium features through in-app purchases. This attracts a large user base while generating revenue from paying users.
- **Subscription Model:** This model provides recurring revenue, especially ideal for apps offering valuable ongoing services or content.

Effective app store optimization (ASO) is also crucial. This involves optimizing your app's title, description, keywords, and screenshots to improve its visibility in search results.
