Implementing Evernote GTD: A

Step-by-Step Guide

Implementing Evernote GTD requires a structured approach. Here's a breakdown of the process, aligned with the five stages of GTD:

1. Capture: This initial phase involves getting everything out of your head and into Evernote. Use Evernote's quick note feature to capture emails, ideas, tasks, and anything else that demands your attention. Employing specific keywords and hashtags for later retrieval is crucial. For example, `#projectX #@work #nextAction: call John` adds context and priority.

2. Clarify: Next, you need to process these captured items. Review each note and determine if it's actionable. If it is, define the next concrete physical action required. If not, file it away in an appropriate notebook (e.g., "References," "Someday/Maybe"). This step involves breaking down large projects into smaller, manageable tasks.

3. Organize: This is where Evernote's organizational features shine. Use notebooks to categorize your projects (e.g., "Work Projects," "Personal Projects"), stacks to group related notebooks, and tags to add context and filter tasks (@home, @computer, @phone, etc.). Consider creating separate notebooks for your "Next Actions," "Waiting For," "Someday/Maybe" lists—key components of the GTD methodology.

4. Reflect: Regularly review your system (weekly is recommended). This process involves checking your "Next Actions" list, reviewing your projects, and identifying any roadblocks. This helps you stay on track and adapt your plans as needed. Evernote's search function is invaluable here, allowing you to quickly find specific tasks or projects.

5. Engage: This final stage involves actively working on your tasks. Prioritize your "Next Actions" based on context, urgency, and importance. The aim is to select tasks that align with your current location and available time.

Regular review and consistent processing of incoming information are key to preventing this. Finding the optimal balance between detailed note-taking and concise action items requires practice. Experimentation with different organizational structures is essential to finding a setup that works best for you.
